# INTRODUCTION

---

The Eaton County Road Commission is responsible for the maintenance of 1,174 miles of road, of which about 392 miles are designated as Primary Roads and 782 miles designated as Local Roads. The local road system includes approximately 502 miles of gravel surfaced roads and 125 miles of subdivision streets.

Service is provided to the county road system from three garages located in Vermontville Township, Delta Township, and the main office in the City of Charlotte. In general, the crew from the main garage in Charlotte serve the southeast and southwest areas of the County, the crew based in Vermontville serve the northwest quarter of the County, and the crew based in Delta Township serve the northeast area.

The Road Commission utilizes state Asset Management principles to keep existing good roads in good condition, rather than deferring maintenance on those roads to pay for the improvement and/or construction of new roads. To help with these principles, the Road Commission prepared and submitted a Transportation Asset Management Plan that fulfills the requirements of Michigan Public Act 325 of 2018. The Asset Management Plan includes a list of planned projects for 2024-2026, which represents the best estimate of future projects. However, changes in design, funding, and permitting may require the planned project list to be altered.

Recognizing the need for long range planning for improvements on the county road system, the Road Commission participates in the Tri-County Regional Planning Commission planning process and actively seeks and competes for Federal and State grant funds.

The Road Commission welcomes comments, suggestions, and discussion on both programs and specific projects at any time.

## PROJECT SUMMARY

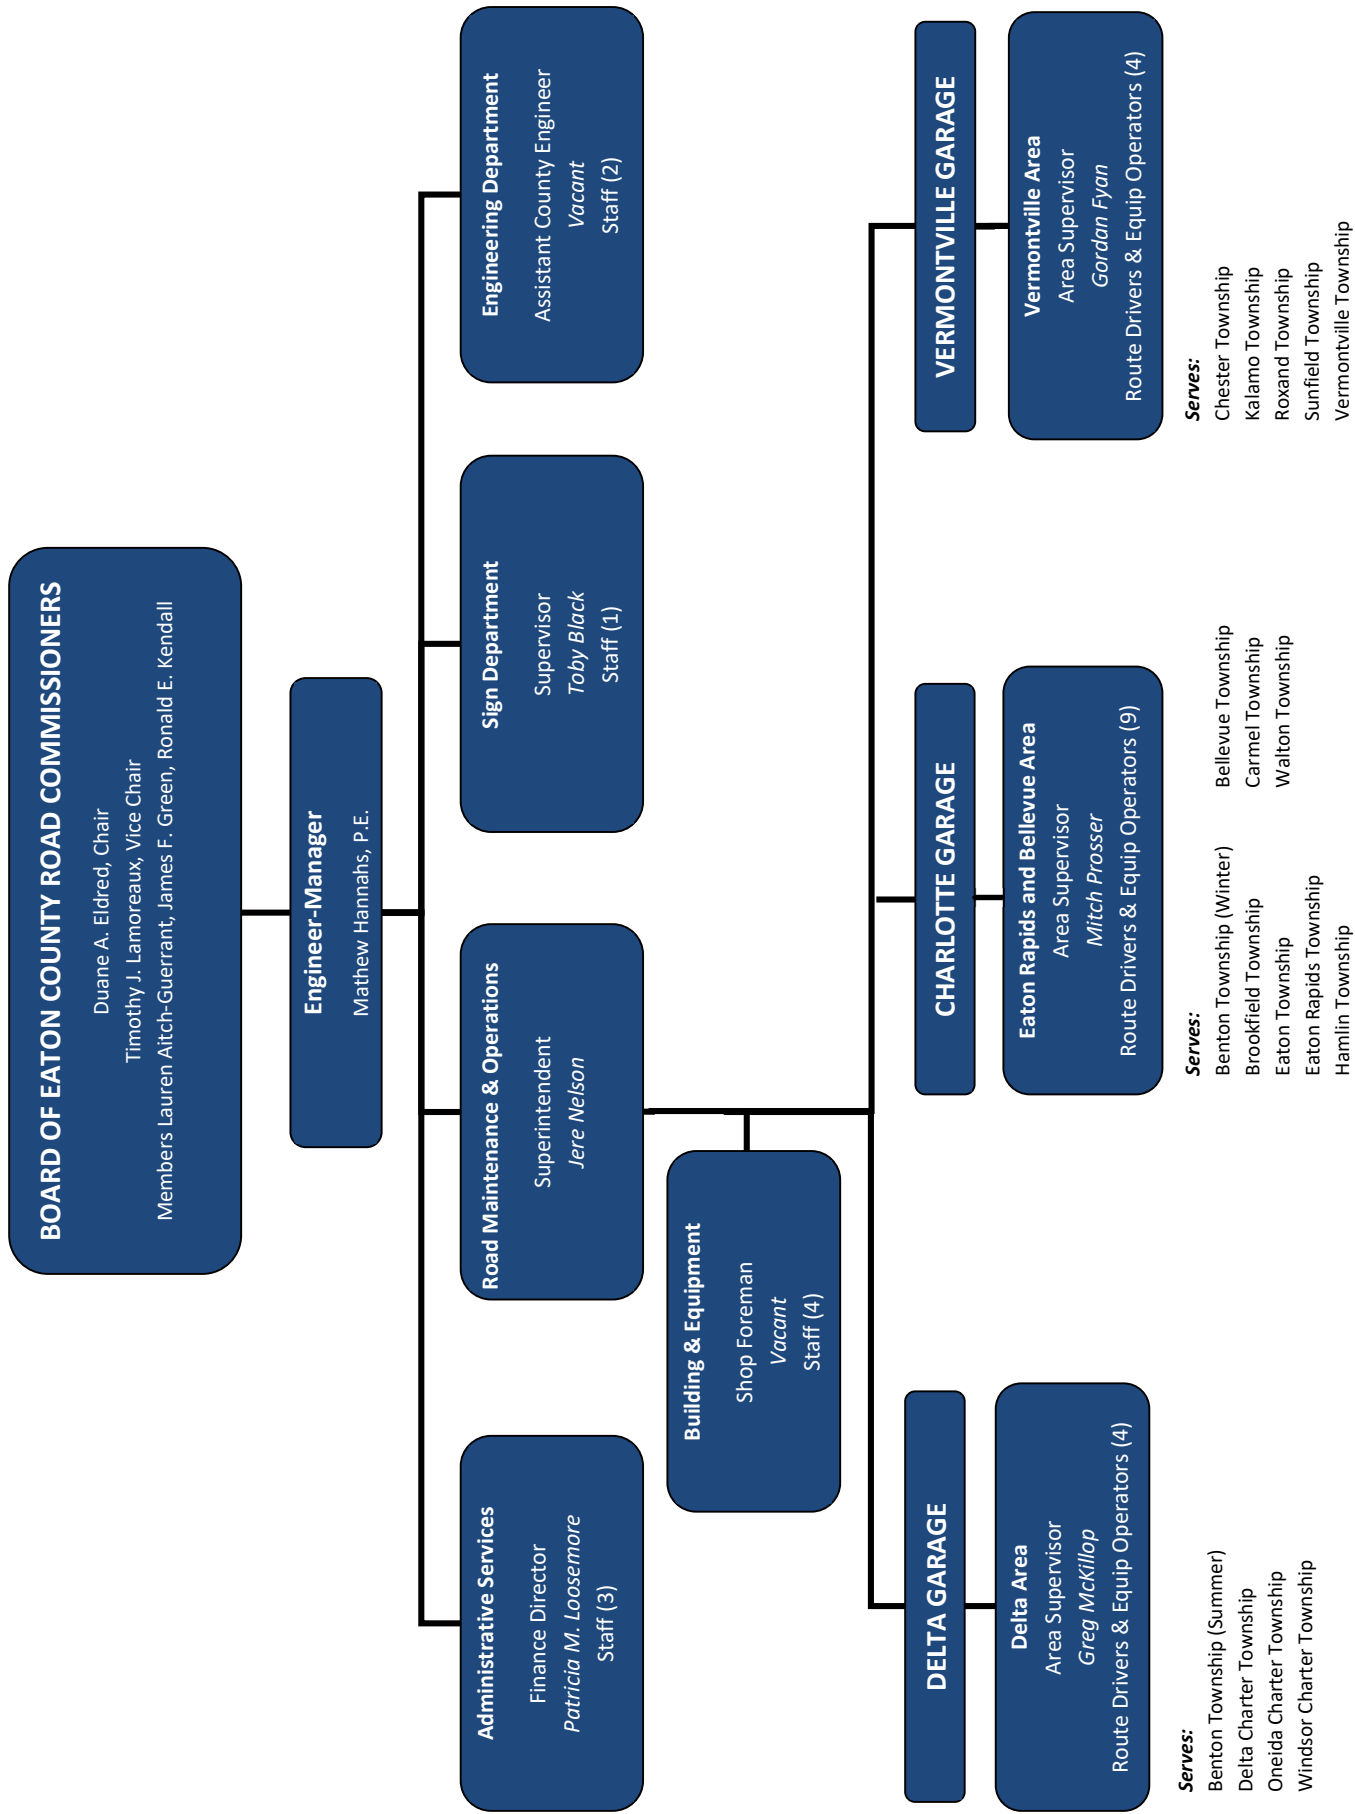

On Primary Roads in 2024, the Road Commission used road commission funds to resurface 14.4 miles as well as apply a chip seal to 58 miles to extend the life of the existing pavement surfaces. The Road Commission used Federal funds to widen, crush, shape, and resurface 1.0 mile of Nixon Road from Mt. Hope Highway to St. Joe Highway and resurface 2 miles of Oneida Road from St. Joe Highway to M-43. The Road Commission used road commission funds to reconstruct and rehabilitate 2 miles of Royston Road from Five Point Highway to M-50.

On Local Roads, 2024 marked the 10th year of the 12-year road rehabilitation program funded by the county-wide road millage. As part of the millage program, the Road Commission repaired and resurfaced 16 miles of paved Local roads, with 2.5 miles of those roads being pulverized prior to paving. The Road Commission also graded and spread new gravel on 78 miles of existing gravel surfaced roads. In addition to the millage projects, the road commission applied a chip seal to 19 miles of Local Road with the cost of 2 of those miles being split 50/50 with Hamlin Township. The Road Commission has supplemented the millage program with road commission funds to ensure a successful program. While the completed millage program projects are noted in the following pages, a supplemental multi-year millage report is available separately.

The Road Commission received MEDC funds to improve the road system around the new battery plant in Delta Township. With those funds, one mile of Davis Highway from Nixon Road to Guinea Road was reconstructed to handle the additional traffic to the plant. No road commission nor millage funds were used for this improvement.

In 2024, the Road Commission received State and Federal bridge program funds along with matching funds from Hamlin Township to perform preventative maintain on the Smithville Road bridge.

The Road Commission replaced about 39 crossroad culverts smaller than 36 inches on Primary and Local Roads in preparation for upcoming projects. In addition, the Road Commission replaced 4 county drain culverts that cross county roads in cooperation with the Eaton County Drain Commissioner's Office, and Walton Township provided matching funds to replace the culvert crossing on Harris Road that had failed.
